

We are thrilled to announce the launch of our upgraded Moodle course, designed for managers and practitioners navigating the evolving realm of vocational education and training (VET) and IAG services.

*The Digital Imperative:* In today's fast-paced world, the transformation of VET and IAG services into e-services is not just a trend—it's an imperative. The European Commission underscores the significance of bridging the digital skills gap, positioning it as a top priority. It is within this context that our Moodle platform steps in.

Key Features:

*Comprehensive Project Hub:* Explore additional project-related materials housed on the GeGS website, providing a comprehensive hub for all project-related information.

*Interactive Learning Experience:* Experience our interactive Moodle platform. Students can create their accounts, fostering a personalized learning journey where they can trace their progress and actively engage with the course content.

*CEDEFOP Clusters:* Explore the essential competences and skills required in the field of IAG as outlined by CEDEFOP (European Centre for the Development of Vocational Training). Our platform provides a dedicated section, "CEDEFOP - CLUSTERS OF PROFESSIONAL COMPETENCES," where case studies are thoughtfully organized to align with these competency clusters.

*Thematic Tracks:* Begin a structured learning experience with our carefully designed thematic tracks. Delve into specialized topics, explore interconnected case studies, and deepen your knowledge in specific areas. These thematic tracks are tailored to meet the precise training needs of both practitioners and managers, offering a holistic and comprehensive learning experience.

*Practical Learning with Case Studies:* Our course also offers practical learning. Case studies serve as useful tools, enabling you to apply professional and digital skills in real-life scenarios. Tackle common challenges faced by guidance practitioners and develop effective solutions using your newfound knowledge and skills.

*Navigating the Learning Path:* Navigating through the learning materials is intuitive. In the "CEDEFOP - CLUSTERS OF PROFESSIONAL COMPETENCES" section, case studies are organized into three categories: Practitioner Skills & Values, Working with Clients, and Systems and Networks. Thematic Pathways cross-reference case studies, grouping them into tracks designed to cater to the specific training needs of practitioners and managers.

We are excited to accompany you on this journey of professional and digital development.

Join us in shaping the future of IAG services. Your learning adventure begins now!
